DECEMBER 2023 REPORT

I started on the 1st of December, 2023. All our patients arrived at the Foundation for their daily vital signs. I started treating them immediately it was 8.00 am. I checked our patients' Blood Pressure and their Fasting Blood Sugar and rounded up at 3.00 pm.

Our Doctor visited our patients on the 13th of December, 2023. He examined our patients and diagnosed, them while I checked their Blood Pressure and Fasting Blood Sugar. After the doctor's examination, eighteen (18) patients with high blood pressure were diagnosed and they were given treatment accordingly. Patients with high blood sugar levels were six (6), and both patients with high blood pressure and high blood sugar levels were treated and encouraged to continue taking their drugs which will reduce in a short time. Our patients with high blood pressure in the range of one-ninety-five (195) mmHg reduce to one-thirty (130) mmHg and those with high blood sugar levels range from 361mg to 190mg.

This month of December 2023, 220 (Two Hundred and twenty) patients were checked for blood pressure while 88 (eighty-eight) patients were checked for fasting blood sugar. And patients with other sicknesses like neck pains, chest pains, headache, and earache were also treated. The conditions of our patients were good. Nurse Opara Maria and all patients of the Hoffnung Chinonso Foundation appreciate the good work you people have been doing for them. And we all are saying God bless Rev. Father Reginald and his friends in Germany. May God bless you all Amen Happy Christmas and a graceful new year!!!
