OCTOBER 2023 REPORT

I started on the 1st of October, 2023. All our patients arrived at Foundation for their daily vital signs. I started treating them immediately it was 8.00am in the morning. I checked our patients' Blood Pressure and their Fasting Blood Sugar and rounded up at 3.00pm.

The Doctor visited our patients on the 25th of October, 2023. He examined our patients and diagnosed, while I checked their Blood Pressure and Fast Blood Sugar. After the examination, seven (7) patients with high blood pressure were diagnosed and they were given treatment accordingly. Patients with high blood sugar level were five (5), both patients on high blood pressure and high blood sugar level were advised to continue taking their drugs and after drinking all their drugs their high blood pressure and high blood sugar level will be reduced. Most of our patients with high blood pressure in the range of 210/130mHg, now ranged to 180/100mmHg. Likewise those with high blood sugar level range at 364mg after taking their drugs, it ranges to 154mg.

This month of October, 2023, 215 (two hundred and fifteen) patients were checked for blood pressure while 82 (eighty two) patients were checked for fasting blood sugar. Then other patients with heartburns, heart palpitation cough and body pains were examined by our Doctor and they all were treated. We lose one of our patient Mr. Uzogo Oliver on 14th October, 2023 may his soul rest in perfect peace Amen. Our patient's conditions were good and healthy.
