SEPTEMBER 2023 REPORT

I started on the 1st of September, 2023. All our patients arrived at Foundation for their daily checking of vital signs. I started treating them at 8.00am in the morning. I checked their Blood Pressure and Fasting Blood Sugar and rounded up at 3.00pm each day.

The Doctor visited our patients on the 27th of September, 2023. He examined our patients and diagnosed, while I checked their Blood Pressure and Fasting Blood Sugar. After the Doctor's examination, he diagnosed, patients with high blood pressure were Eight (8) while patients with high blood sugar were Three (3) both patients with high blood pressure and high blood sugar level was diagnosed and they were given treatment accordingly. They were advised to continue taking their drugs, it will later reduced our patient with high blood sugar level in the range of 344mg reduces to 150mg and patients with high blood pressure in the range of 210/130mmHg. After taking their drugs it ranges to 145/95mmHg.

This month of September 2023, (Two Hundred and Twenty)220 patients were checked for blood pressure while 90 (ninety) patients were checked for fasting blood sugar. Then other patients with malaria, typhoid, headache, chest pains and other minor sicknesses were examined and treated. Our patients conditions were fine and good.
